

Environmental Policy

Energy Saving Lighting is an LED Lighting consultancy company which offers LED lighting/Solar PhotoVoltaic solutions available to all sectors across the UK. The company is committed to protecting the environment of the Earth as well as the continual improvement of environmental performance.

Following the review of significant aspects and impacts related to ESL activities, the following adapted environmental policy has been generated with the support of senior management. Reducing carbon emissions within all direct operations with the aim to be net zero by 2030. We are committed to meeting or exceeding latest environmental legislation which apply to the relevant operations, including commitments to a reduction in energy usage and improved waste disposal systems. Furthermore, we will encourage suppliers and contractors to adopt similar environmental procedures in their operations for a cleaner upstream supply chain. ESL's Environmental Policy is fully supported by the CEO and Senior Management. All staff share the responsibility of adhering and performing to achieve agreed objectives generated, which provides an ongoing focus. As well as taking accountability for the outcomes of the EMS.

ESL commits to:

- Continually improve its EMS to enhance its environmental performance,
- Protecting the environment and preventing pollution, and
- Conform with its compliance obligations

The EMS Team will review the policy annually and any revisions will be adopted. The policy will be communicated to all ESL employees through physical copies throughout the office/warehouse as well as being available on the website to be accessed whenever necessary. Signed

A handwritten signature in black ink, appearing to be the initials "JK" or similar, written in a cursive style.
